

Bridging the Communication Gap Between Customers and Developers

Todd Meinershagen, Architecture
RoundTable 1/18/2013

COLLABORATE

Sometimes your best option is to say:
"This is all her fault."

The background of the slide is a painting depicting a group of people in a meeting. One person is pointing at a screen, while others are looking on. The style is somewhat impressionistic with visible brushstrokes.

Manifesto for Agile Software Development

We are uncovering better ways of developing software by doing it and helping others do it.
Through this work we have come to value:

Individuals and interactions over processes and tools

Working software over comprehensive documentation

Customer collaboration over contract negotiation

Responding to change over following a plan

That is, while there is value in the items on the right, we value the items on the left more.

As who, I want
what so that why.

A wooden signpost with three horizontal arrows. The top arrow points right and is labeled 'GIVEN'. The middle arrow points left and is labeled 'WHEN'. The bottom arrow points right and is labeled 'THEN'. The signpost is set against a background of dense green foliage.

GIVEN

WHEN

THEN

Title (one line describing the story)

Narrative:

As a [role]

I want [feature]

So that [benefit]

Acceptance Criteria: (presented as Scenarios)

Scenario 1: Title

Given [context]

And [some more context]...

When [event]

Then [outcome]

And [another outcome]...

Scenario 2: ...

Story: Account Holder withdraws cash

As an Account Holder

I want to withdraw cash from an ATM

So that I can get money when the bank is closed

Scenario 1: Account has sufficient funds

Given the account balance is \ \$100

And the card is valid

And the machine contains enough money

When the Account Holder requests \ \$20

Then the ATM should dispense \ \$20

And the account balance should be \ \$80

And the card should be returned

Scenario 2: Account has insufficient funds

Given the account balance is \ \$10

And the card is valid

And the machine contains enough money

When the Account Holder requests \ \$20

Then the ATM should not dispense any money

And the ATM should say there are insufficient funds

And the account balance should be \ \$20

And the card should be returned

Scenario 3: Card has been disabled

Given the card is disabled

When the Account Holder requests \ \$20

Then the ATM should retain the card

And the ATM should say the card has been retained

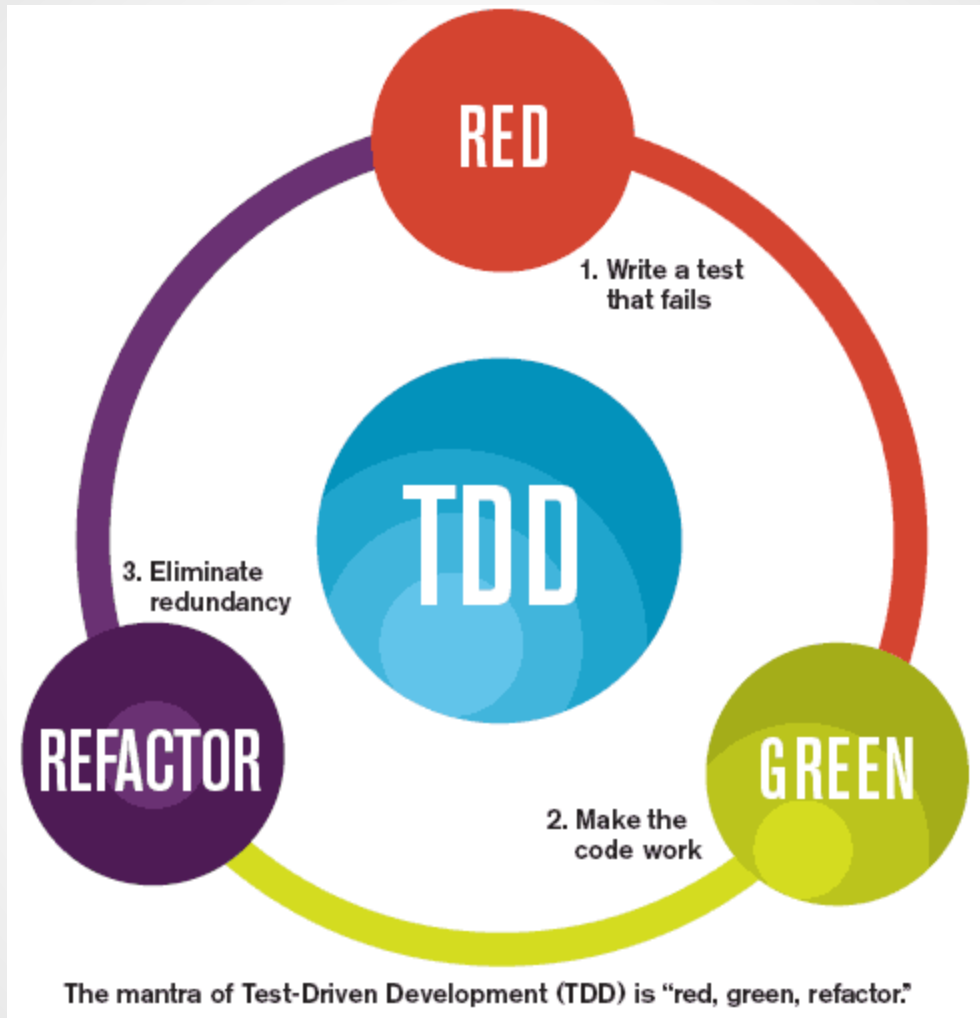

Scenario 4: The ATM has insufficient funds

...

TESTING

I FIND YOUR LACK OF TESTS DISTURBING.
